

The map illustrates the Osaka Gas distribution network. A legend in the top left corner defines the symbols: a red outline for '接続する事業者' (connecting company), a black dot for '製造所・供給所' (manufacturing/supply point), a red circle for '連結点' (connection point), a grey line for '供給区域' (supply area), a red line for '中圧導管' (medium-pressure pipe), and a green line for '他事業者の高圧導管' (high-pressure pipe of other companies). The map shows the Sakai Port Plant (築港工場) as a new manufacturing/supply point, connected to the existing network via a green high-pressure pipe. The connection point is marked with a red circle. The map also shows the existing network of red lines and the supply areas of other companies (grey lines). Labels on the map include '倉敷製造所' (Kure Manufacturing Plant), '水島エルエヌジー' (Mizushima LNG), and '大阪ガス' (Osaka Gas). Technical specifications for the new connection are provided: '350A 6.8Mpa' and '600A 7.0Mpa'.
