

The map illustrates the Osaka Gas distribution network. A legend in the top left corner defines the symbols: a red outline for '接続する事業者' (connected operator), a black dot for '製造所・供給所' (manufacturing/supply point), a red circle for '連結点' (connection point), a grey line for '供給区域' (supply area), a red line for '中圧導管' (medium-pressure pipeline), and a green line for '他事業者の高圧導管' (high-pressure pipeline of other operators). The map shows the Sakai Port Plant (築港工場) as a new manufacturing/supply point, connected to the existing network via a green high-pressure pipeline. The connection point is marked with a red circle. The pipeline is labeled with '350A 6.8Mpa' and '600A 7.0Mpa'. The existing network is shown in red, and the supply area is outlined in grey. The map also shows the location of the Sakai Port Plant (築港工場) and the Osaka Gas plant (大阪ガス).
